Education

2022 – 2027 (exp.)	**Ph.D.** in Economics	Texas A&M University
2017 – 2019	**M.Sc.** in Economics	Higher School of Economics (HSE)
2013 – 2017	**B.A.** in Economics	Higher School of Economics (HSE)

Research Interests

Primary: Macroeconomics and Monetary Economics
Secondary: Financial Economics, Applied Time-Series Econometrics

Work Experience

2019/01 – 2022/04	Economist	Research and Forecasting Department, Bank of Russia
2018/06 – 2018/12	Trainee	Research and Forecasting Department, Bank of Russia

Job Market Paper

"Policy News and Risk Premia in Monetary Policy Announcements" (2026)

Abstract: Interest-rate surprises at FOMC announcements mix four kinds of news: a policy shock, information the Fed reveals about the economy, a Fed response to public news systematically stronger than markets expect, and a shift in the risk premium. Existing methods separate at most three of the four, and disagree about the effects of monetary policy shocks. I identify all four jointly, using sign and magnitude restrictions from a small asset pricing model. Even when all three non-policy shocks are separated out of the surprise, a tightening lowers stock prices, output and the price level. If the response to news is not separated out, these effects are about half as large; if the risk premium is not separated out, they change little. The risk premium accounts for most of the ten-year yield surprise. It partly captures asset-purchase news and raises housing starts and investment.

Work in Progress

1. **"When and to what extent does the Federal Reserve take market forecasts into account?"**

   Abstract: I study whether the Federal Reserve adjusts its policy rate when its own forecasts of GDP growth and inflation differ from those in the Survey of Professional Forecasters. I examine how the policy response to these differences depends on how much forecasters disagree with each other and on the skewness of their individual forecasts.

2. **"The Relevance of Core for Predicting Headline Inflation"** (with Dennis Jansen and Tatevik Sekhposyan)

   Abstract: We study whether core inflation, which excludes food and energy prices, helps predict headline inflation and inflation expectations. We examine what drives the gap between headline and core inflation and how much core measures improve real-time forecasts of headline inflation.

Working Papers

1. **"Hawks, Doves, and the Dot Plot: Heterogeneous FOMC Reaction Functions"** (2026).
2. **"Monetary Policy and the Yield Curve"** with Konstantin Styrin and Alexander Tishin (2022). Bank of Russia Working Paper Series

Teaching Experience

Texas A&M University:

Instructor of Record:

Macroeconomic Theory	Spring 2026

Teaching Assistant:

Introduction to Econometrics	Summer 2024, Fall 2024, Spring 2025
Economic Forecasting	Spring 2024, Fall 2025
Economic Data Analysis	Fall 2023
Macroeconomic Theory	Fall 2022, Spring 2023, Summer 2025
International Macroeconomics	Fall 2026

Higher School of Economics:

Teaching Assistant:

Panel Data Analysis (Master's)	Fall 2019, Spring 2020
Econometrics (Master's)	Fall 2019
Intermediate Macroeconomics	Spring 2017

Conference Presentations

2026	Southern Economic Association (Houston, TX; scheduled), Midwest Macroeconomics Conference (Texas Tech), North Texas Economic Conference (UT Arlington; scheduled), Texas A&M Former PhD Student Symposium & Reunion (poster), Texas A&M Macro Mini-Conference (poster)
2025	Southern Economic Association (Tampa, FL), North Texas Economic Conference (UT Arlington), Texas A&M Macro Mini-Conference (poster)
2020	IV Russian Economic Congress (Russian Academy of Sciences)
2019	Modern Approaches to Forecasting in Central Banks (Bank of Russia)

Awards

Doctoral Research, Travel, and Professional Development Award	Texas A&M University, 2025–26
E. Ralph Daniel Scholarship (Private Enterprise Research Center)	Texas A&M University, 2025
Full-Tuition Merit Scholarship	Higher School of Economics, 2017–19
Full-Tuition Merit Scholarship	Higher School of Economics, 2013–17

Skills, Languages & Hobbies

Programming: Python, Matlab, R, Stata

Languages: English (fluent), Russian (native)
