Appendix A: Robustness

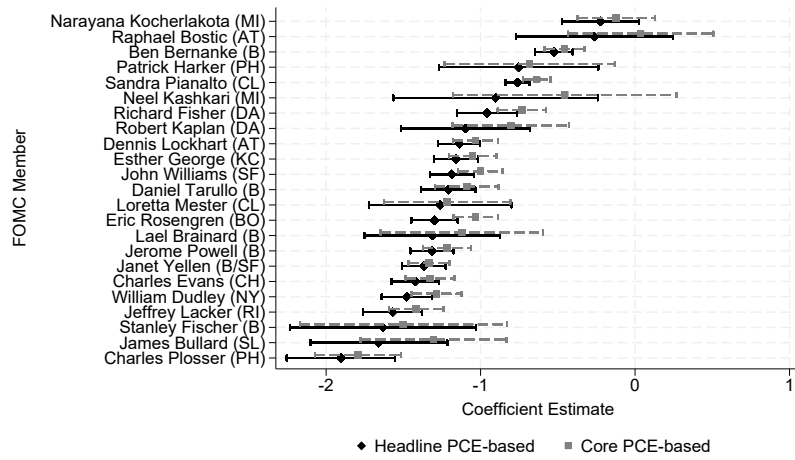

(a) Graph 1: Unemployment gap AMEs

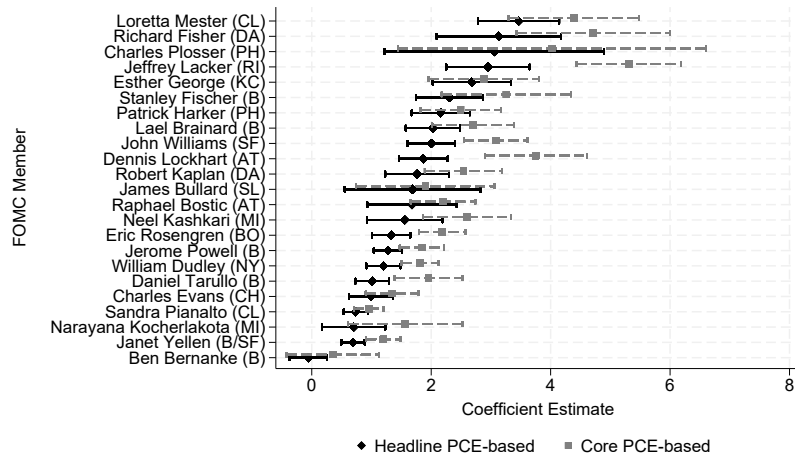

(b) Graph 2: Inflation gap AMEs

Figure 1: Individual policy rule AMEs: Tobit vs OLS

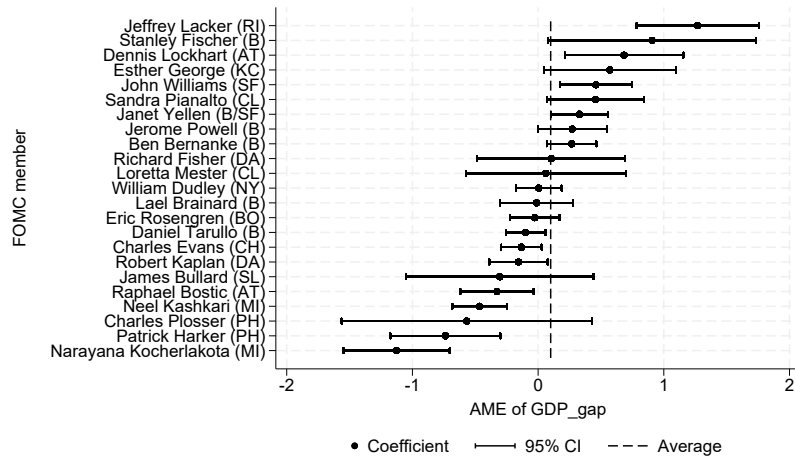

(a) Graph 1: Unemployment gap AMEs

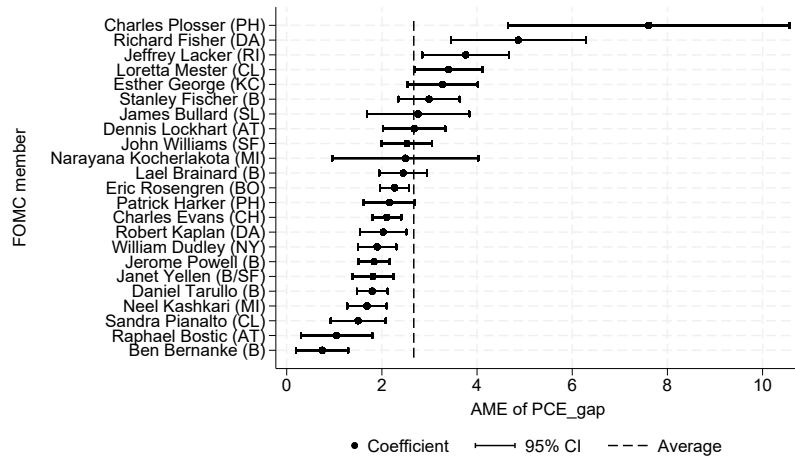

(b) Graph 2: Inflation gap AMEs

Figure 2: Individual policy rule AMEs: Headline vs Core Inflation

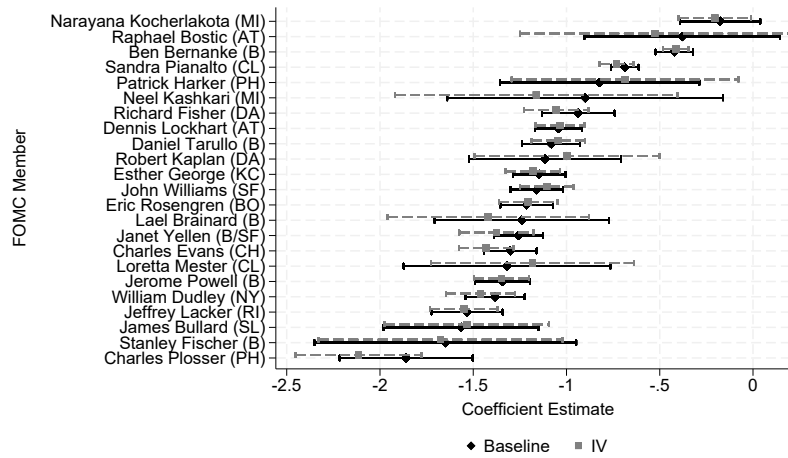

(a) Graph 1: GDP gap coefficient

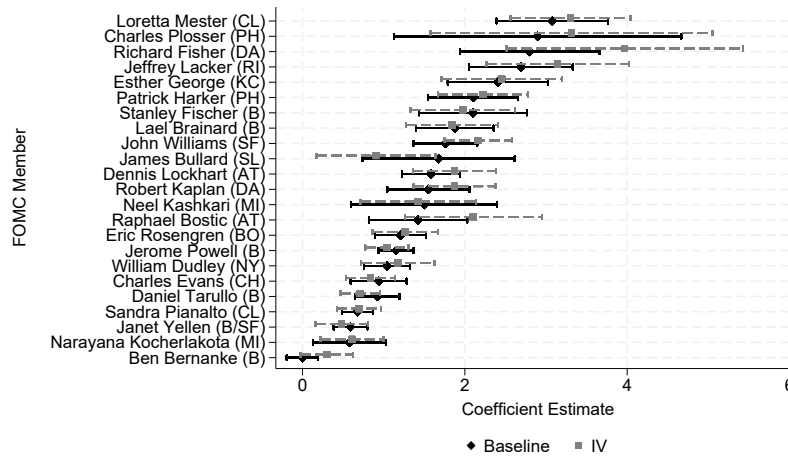

(b) Graph 2: Inflation gap coefficient

Figure 3: Individual policy rule AMEs with the GDP gap

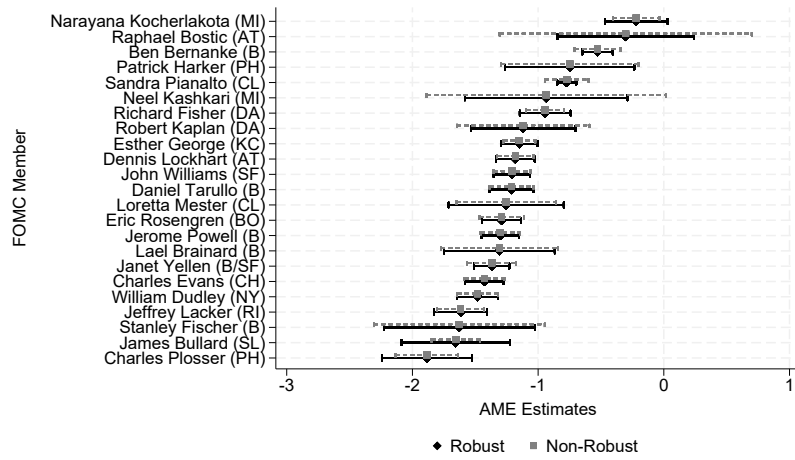

(a) Graph 1: Unemployment gap AMEs

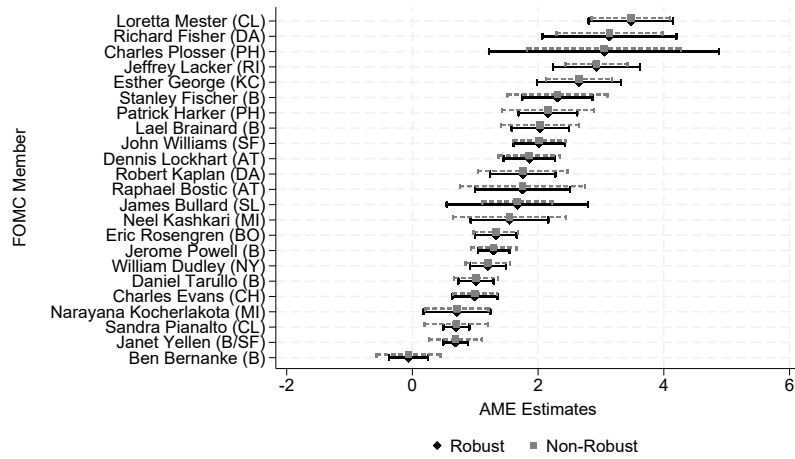

(b) Graph 2: Inflation gap AMEs

Figure 4: Individual policy rule AMEs: Baseline vs Lagged Inputs

Notes: Because the lagged-input model is estimated on a smaller sample, we compute AMEs for both models on the same restricted sample for comparability.

(a) Graph 1: Unemployment gap AMEs

(b) Graph 2: Inflation gap AMEs

Figure 5: Individual policy rule AMEs: Heteroskedasticity-robust standard errors

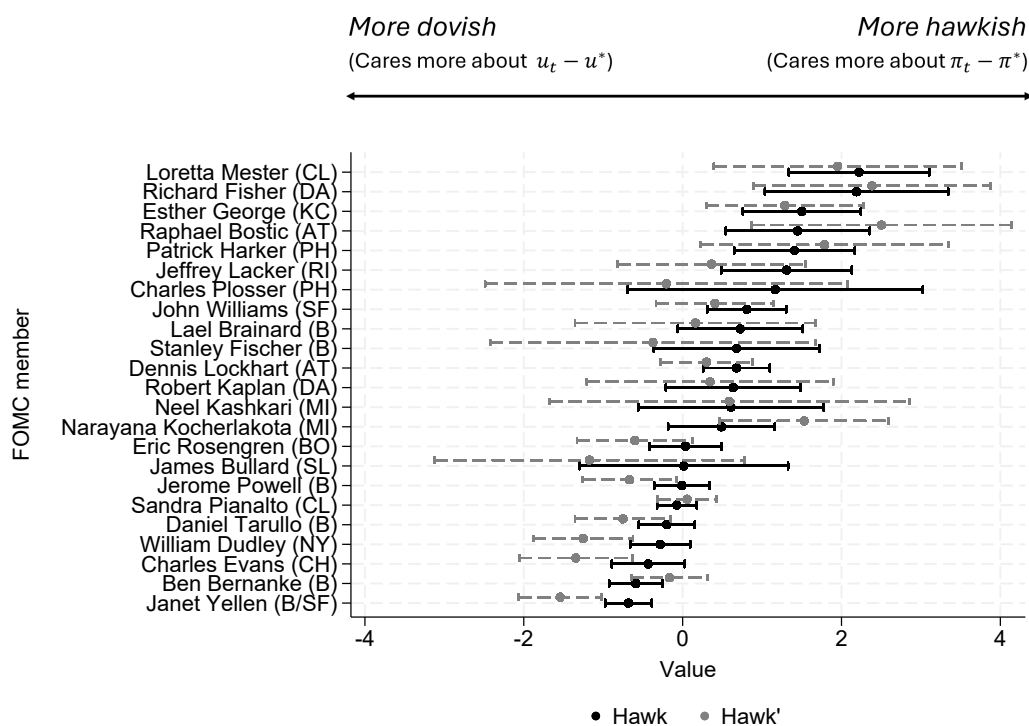

Figure 6: Estimated preferences measure: *Hawk* versus *Hawk'*

Appendix B: Descriptive Statistics

Table 1: Descriptive Statistics of individual characteristics of selected FOMC members

	mean	sd	min	max
Male (1 = Male)	0.84	0.37	0.00	1.00
Freshwater University	0.51	0.50	0.00	1.00
Saltwater University	0.23	0.44	0.00	1.00
Other Universities	0.26	0.44	0.00	1.00
PhD holder	0.63	0.48	0.00	1.00
J.D. degree	0.27	0.44	0.00	1.00
Other degree (MBA, etc.)	0.10	0.31	0.00	1.00
Republican	0.66	0.48	0.00	1.00
Democrat	0.34	0.48	0.00	1.00
Age	58.86	5.87	43.00	74.00
Tenure (Years in Federal Reserve)	16.35	11.58	0.00	37.00
Published in Top 5 Econ Journal (1 = Yes)	0.56	0.50	0.00	1.00
Board Member (1 = Yes)	0.19	0.39	0.00	1.00
Voting Member (1 = Yes)	0.55	0.50	0.00	1.00

Notes: Selected sample covers the period 2012–2019. Members correspond to those used in the main analysis.

Appendix C: Sources of heterogeneity

Table 2: Determinants of Heterogeneity in policy rule AMEs: Unemployment Gap Interactions

	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
<i>Freshwater University</i> ⁽¹⁾	0.129* (0.073)								
<i>Age</i> ⁽²⁾		-0.016*** (0.006)							-0.029*** (0.007)
<i>Board</i> ⁽³⁾			-0.208*** (0.054)						-0.177* (0.103)
<i>Male</i> ⁽⁴⁾				0.158** (0.064)					0.032 (0.103)
<i>PhD vs Other Degrees</i> ⁽⁵⁾					-0.237*** (0.055)				-0.647*** (0.095)
<i>J.D vs Other Degrees</i> ⁽⁶⁾					-0.273*** (0.065)				-0.261** (0.124)
<i>Publications in top 5</i> ⁽⁷⁾						-0.107** (0.053)			0.342*** (0.139)
<i>Democrat</i> ⁽⁸⁾							-0.098* (0.056)		0.067 (0.067)
<i>Tenure</i> ⁽⁹⁾								0.003 (0.002)	-0.008*** (0.003)
AIC	2398	2397	2403	2416	2380	2409	2406	2416	2319
Member & Time FE	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Observations	1455	1455	1455	1455	1455	1455	1455	1455	1455

Robust standard errors in parentheses. * $p < 0.1$, ** $p < 0.05$, *** $p < 0.01$.

Notes: (1) = change in AME compared to a Saltwater University graduate. (2) = change in AME if age increases by 1 year from the sample average (56 years). (3) = AME of Board member compared to a regional president. (4) = AME of a male FOMC member compared to a female member. (5) = change in AME if a member has a PhD in Economics or Political Economics compared to a member with another degree (BA or MBA). (6) = change in AME if a member has a J.D. degree compared to a member with another degree (BA or MBA). (7) = change in AME if a member has at least one publication in a top-5 economics journal. (8) = AME of an FOMC member affiliated with the Democratic party compared to Republican affiliation. The political affiliation of the Fed Chair is based on the affiliation of the U.S. president who nominated the Chair. The political affiliation of regional Presidents is based on the affiliation of the Chair under whom the member was appointed. (9) = change in AME if the number of years working in the Fed is increased by 1 year from the sample average (15 years). Note, there are no Freshwater graduates who served as board members in the same, so I decided to include only the Board variable in the last regression.

Table 3: Determinants of Heterogeneity in policy rule AMEs: Inflation Gap Interactions

	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
<i>Freshwater University</i> ⁽¹⁾	0.149 (0.197)								
<i>Age</i> ⁽²⁾		-0.002 (0.012)							-0.005 (0.013)
<i>Board</i> ⁽³⁾			-0.475*** (0.119)						-0.946*** (0.354)
<i>Male</i> ⁽⁴⁾				0.087 (0.157)					-0.117 (0.257)
<i>PhD vs Other Degrees</i> ⁽⁵⁾					-0.149 (0.148)				-1.477*** (0.488)
<i>J.D vs Other Degrees</i> ⁽⁶⁾					-0.503*** (0.159)				-0.065 (0.302)
<i>Publications in top 5</i> ⁽⁷⁾						0.043 (0.131)			1.19** (0.469)
<i>Democrat</i> ⁽⁸⁾							-0.308** (0.127)		-0.275 (0.223)
<i>Tenure</i> ⁽⁹⁾								0.019*** (0.005)	-0.007 (0.011)
AIC	2398	2397	2403	2416	2380	2409	2406	2416	2319
Member & Time FE	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Observations	1455	1455	1455	1455	1455	1455	1455	1455	1455

Robust standard errors in parentheses. * $p < 0.1$, ** $p < 0.05$, *** $p < 0.01$.

Notes: (1) = change in AME compared to a Saltwater University graduate. (2) = change in AME if age increases by 1 year from the sample average (56 years). (3) = AME of Board member compared to a regional president. (4) = AME of a male FOMC member compared to a female member. (5) = change in AME if a member has a PhD in Economics or Political Economics compared to a member with another degree (BA or MBA). (6) = change in AME if a member has a J.D. degree compared to a member with another degree (BA or MBA). (7) = change in AME if a member has at least one publication in a top-5 economics journal. (8) = AME of an FOMC member affiliated with the Democratic party compared to Republican affiliation. The political affiliation of the Fed Chair is based on the affiliation of the U.S. president who nominated the Chair. The political affiliation of regional Presidents is based on the affiliation of the Chair under whom the member was appointed. (9) = change in AME if the number of years working in the Fed is increased by 1 year from the sample average (15 years). Note, there are no Freshwater graduates who served as board members in the same, so I decided to include only the Board variable in the last regression.

Appendix D: Real natural rate

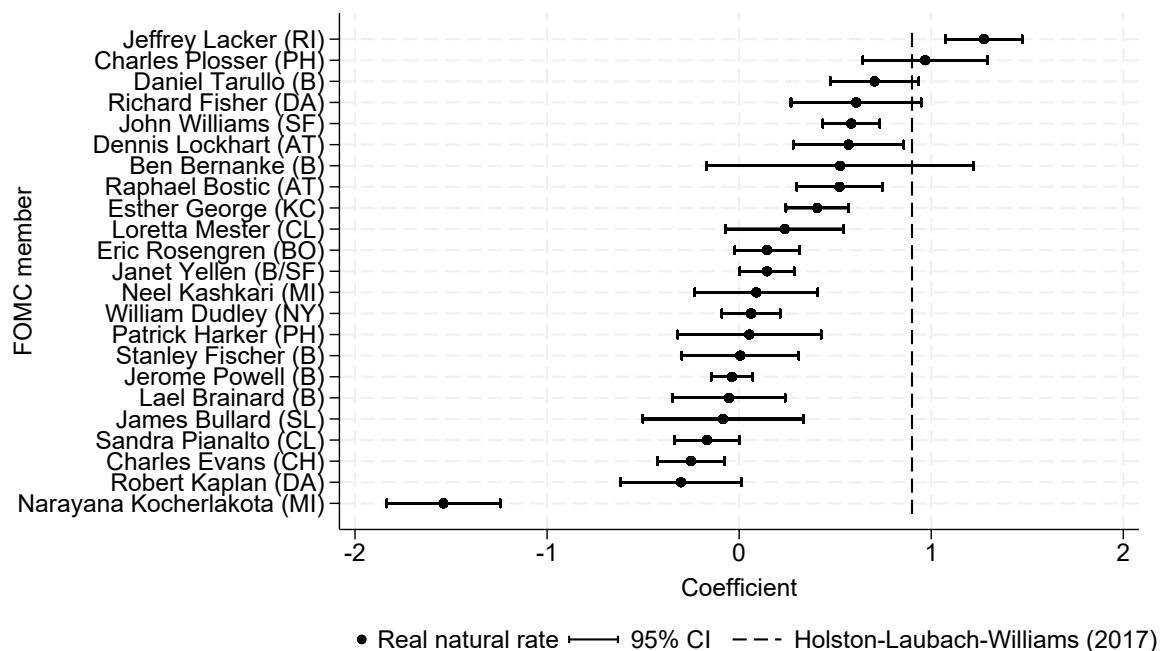

Figure 7: Average real natural rate estimates by FOMC member.

Notes: Average real natural rates by FOMC member are estimated as the predicted (forecasted) policy rate when both the forecasted inflation gap and the unemployment rate gap are set to zero, with time effects held at their observed values. The real rate is then obtained by subtracting each member's corresponding average long-run inflation forecast. For reference, the 2025Q1 vintage average estimate for 2012–2019 from Holston, Laubach, and Williams (2017) is shown. Note that real-time estimates vary substantially and were below zero for much of 2012–2015, resulting in some members having negative estimated real natural rates.
